Download the latest version from <u>www.chauvetdj.com</u>.

Document Revision

This FlareCON User Manual is the 1st edition of this document. Go to <u>www.chauvetdj.com</u> for the latest version.

1. Setup

Downloading the App

The FlareCON app is available from the Google Play Store or the Apple App Store. The FlareCON Air 2 wireless transceiver is not required at the time of downloading or installing the app, but it is required to control lights. For more information about downloading and installing apps onto your mobile device, see the documentation that came with your mobile device.

Before connecting to the FlareCON Wi-Fi network, ensure that the FlareCON Air 2 is in Wi-Fi mode. For further instructions on setting the FlareCON Air 2 to Wi-Fi mode, see the FlareCON Air 2 User Manual at <u>www.chauvetdj.com</u>

Connecting to the FlareCON Wi-Fi Network

The WELL COM generates a Wi-Fi signal, which a mobile device running the app must connect to in order to control any lights.

- 1. Hold **<MENU>** and **<ENTER>** for 3 seconds to power on the FlareCON Air 2.
- 2. Turn on Wi-Fi on your mobile device.
- 3. Go to the Wi-Fi settings on your mobile device and connect to the FlareCON Air 2 default Wi-Fi (SSID).

While connecting to the Internet, it will display "Checking the quality of your Internet connection...". Once connected to the FlareCON Wi-Fi, it will display "Connected without Internet".

FIXTURES

The FlareCON app allows users to patch single fixtures or to add fixtures to groups.

Fixtures

To patch a single fixture:

- 1. Locate and tap the **FIXTURES** icon at the bottom of the page.
- 2. Select the **Fixtures** tab at the top of the page. This will display the previously patched fixtures.
- 3. If there are no existing fixtures saved, "No Fixture to show" will be displayed. Tap **Add Fixtures** to view the available fixtures that can be patched.

4. If there are existing fixtures saved, tap **Add a New Fixture** to view the available fixtures.

Patch Fixtures					
Fixtures	Groups				
Name	Personality	Address			
Add a New Fixture					
🔆 - 4BAR FLEX Q ILS	4-CH	1			

5. Select from the list of fixtures or search for fixtures by typing the name in the search bar.

<	Patch Fixtures
Q Search for Product	
4BAR FLEX Q ILS	
4BAR FLEX T USB	
4BAR LT QUADBT ILS	
4BAR QUAD ILS	
4BAR TRI USB	

6. After selecting the fixture, the **Fixture Details to Add** box will appear. Set the Fixture Name, Personality, Address, and Quantity before tapping **Add To Fixtures.** Note that the available personalities for each fixture will be automatically displayed in a drop-down box once the Personality option is chosen.

FREEDOM PAR TRI 6

	🄆 4BAR FLEX Q ILS	4-CH	
Ŵ	🔅 FREEDOM STICK	50-CH	5

Groups

The **Groups** tab lists all groups and allows users to add new groups, highlight an entire group, view fixtures listed in a group, or delete a group from the list.

To add a new group:

- 1. Locate and tap the **FIXTURES** icon at the bottom of the page.
- 2. Tap the **Groups** tab at the top of the page. This will display the groups that have been previously created and saved.
- 3. If there are no existing groups listed, tap Add Groups.

4. If there are existing groups listed, tap **Add a New Group**, and follow instructions 5–7 below on how to create a new group.

3:27 PM Thu Jan 19			\$ 53%

2. Operation

The FlareCON app runs on Apple iOS to control any CHAUVET DJ Freedom or D-Fi receiver as well as any other LED static wash light from your smartphone or tablet (additional hardware required). The Wi-Fi signal is generated from the FlareCON Air 2 hardware interface, and no other Wi-Fi signals are needed.

The FlareCON app has built-in profiles for all 4BAR, COLORband, COREpar, EVE, EZPar, Freedom, SlimBANK, and SlimPAR products. The FlareCON app can create and store up to 18 scenes with 20 steps each. Each scene can be assigned a Fade Time and Hold Time, with customizable effects, and can be exported to other users across both iOS and Android platforms.

PROGRAM

To program the light output on an intended fixture:

- 1. Tap the **PROGRAM** icon at the bottom of the screen.
- 2. On the **Program** page, choose the fixture(s) or group(s) to be programmed by checking the black pop-up circle next to the fixture name(s). If choosing all the fixtures available, select **All**.
- 3. Tap Start Programming.

Only patched fixtures can be programmed (see <u>FIXTURES</u> for instructions on how to patch fixtures to the FlareCON App).

Operation

4. After tapping the **Start Programming** button, the **Multiple Fixtures** page will appear. From here, it is possible to add static colors or choose an effect.

<	Multiple Fixtures	
	Static Color	
	Choose an Effect	
Paparazzi	Strobe	Fade
Flicker	Pulse	Pairs
Rainbow		

5. When choosing a single fixture or multiples of the same fixture type, the product name will be displayed on the fixture page, and the advanced programming option will be enabled (see <u>Advanced</u>).

<	FREEDOM STICK	
	Static Color	
	Choose an Effect	
Paparazzi	Strobe	Fade
		<mark>6</mark> 6
Flicker	Pulse	Pairs
<mark>8 8</mark> 8 8		
Rainbow		
	Advanced	

The fixtures have to be of the same type to enable the option for advanced programming.

Static Color

To design static colors for a scene:

1. Tap the **Static Color** box at the top of the page.

2. A pop-up box will appear with color presets, a color fader, and a color picker. These are 3 methods of designing the color output.

3. When using the color presets, color fader, or color picker to design a color, a preview of the design will display in a color box in the middle of the screen.

Color Picker

The color picker provides a 360° color spectrum for selecting and refining the color output.

To use the color picker:

- 1. Tap and hold any area of the color picker.
- 2. Swipe in any direction to adjust the colors on the color picker.
- 3. Save to color preset if desired (see Color Preset).

Color Fader

The color fader provides faders for each available color and a fader value box for displaying specific color values.

Fader Value

To customize colors using the color faders:

- 1. Tap and hold one of the faders in a color bar. The available colors will depend on the fixture in use.
- 2. Drag the fader to the left or right to increase or decrease the value of the chosen color.

3. The value of the color will appear in the fader value box.

- When the faders are moved, the numbers in the fader value box will change, and the color picker will move to correspond to the newly selected value.
- The available colors next to the fader value boxes will vary depending on the patched fixture or the fixture being programmed.

To customize colors using the fader value boxes:

- 1. Tap any of the fader value boxes. The numerical wheel will appear at the bottom of the screen.
- 2. Choose the desired value using the numerical wheel. The value should be between 0 and 255. Tap **Confirm**.

- 3. Adjust another color by selecting the fader value box next to it and repeating steps 1 and 2 above.
- 4. Once all desired values have been entered, tap **Confirm** or select anywhere outside of the numerical wheel to return to the **Fixture** page.

Color Preset

The preset mode provides a selection of previously designed colors that the user has saved. There are a total of 14 customizable presets. The default setting does not include any saved presets.

To design a custom preset:

- 1. Tap the desired custom preset box.
- 2. Design a color using the color picker or the color fader (see <u>Add to Show</u> and <u>Color Fader</u>).
- 3. Once the desired color appears in the color box, select the **Save Preset** icon to the right of the color box.
- 4. Tap another custom preset box to program it. If another custom preset box is not selected, the function will automatically default to the next custom preset box to the right.

To delete a custom preset:

- 1. Tap and hold the desired custom preset box for 3 seconds. A pop-up box will present the option to delete the preset.
- 2. Select Confirm to delete or Cancel to keep the custom preset.

Add to Show

The FlareCON allows users to create a new show or add to a saved show with multiple steps and scenes by pressing **Add to Show** after customizing the preset colors and effects.

To create a new show:

- 1. Select a color or colors on the fixture page (see Static Color for further instructions).
- Tap Add to Show at the bottom of the page.

3. In the fixture page, type the name of the show into the **Name of Show** box.

<	FREEDOM	I STICK		
	Add P	ם hoto		
Name of Show				
Type name here				
Scene		Step		
1		1		
Hold Time (Min / Sec)		Fade Time (Min / Sec	:)	
0.1		0.0		

Operation

4. Select the arrow in the **Scene** box or **Step** box to trigger the drop-down menu.

Step is a single effect. Scene is a combination of multiple steps.

5. Select the arrow in the **Hold Time** box or **Fade Time** box to trigger the drop-down menu and choose the number of minutes and seconds for each function.

Hold O	d Time (Min / Sec) .1	Fade Time (Min / Sec)	•
	Cancel		Confirm
	0	1	

Hold time is the amount of time a scene is held. Fade time is how long it takes for the scene to fade in and out. Both are measured in minutes and seconds.

6. Once completed, press **Add to saved show**. The saved show will then become viewable under the **PLAYBACK** tab.

	Add to sa	ived show	
FIXTURES	الم الم	:	ک
	PROGRAM	рLауваск	settings

Choose an Effect

The FlareCON allows users to add customizable preset effects to a show.

Paparazzi

This effect enables a flickering/flashing function across all selected fixtures at different rates on each fixture. To add the Paparazzi effect:

- 1. Select Paparazzi.
- 2. Select the desired color by selecting the color box.
- 3. Select Add to Show.

Strobe

This effect enables all fixtures to strobe at once. To add the Strobe effect:

- 1. Select **Strobe**.
- 2. Select the color by selecting the color box.
- 3. Set the speed of the strobe by dragging the slider left or right.
- 4. Select Add to Show.

Fade

This effect enables fading transition between colors. To add the Fade effect:

- 1. Select Fade.
- 2. Choose the colors by selecting the color boxes.
- 3. Change the fade time and hold time by dragging the slider left or right.
- 4. Select Add to Show.

Flicker

This effect alternates between base color and the color of the strobe. To add the Flicker effect:

- 1. Select Flicker.
- 2. Choose the flicker/background color by selecting the color box.
- 3. Set the flicker speed by dragging the slider left or right.
- 4. Select Add to Show.

Pulse

This effect makes the light fade to black first, then transitions to the next selected color. To add the Pulse effect:

- 1. Select Pulse.
- 2. Choose the colors by selecting the color boxes.
- 3. Change the fade time and hold time by dragging the slider left or right.
- 4. Select Add to Show.

Pairs

Every other fixture would be color 1 and the others will be color 2, and it transitions between the two colors. To add the Pairs effect:

- 1. Select Pairs.
- 2. Choose the colors by selecting the color boxes.
- 3. Change the fade time and hold time by dragging the slider left or right.
- 4. Select Add to Show.

Rainbow

This effect applies a rainbow effect to all fixtures. One color per fixture. To add the Rainbow effect:

- 1. Select Rainbow.
- 2. Choose the colors by selecting the color boxes.
- 3. Change the fade time and hold time by dragging the slider left or right.
- 4. Select Add to Show.

To change the names of any of the effects, select the effect and type in a new name in the Name of Effect page.

Advanced

The FlareCON allows users to adjust advanced programming such as the dimmer, auto programs, and color temperature.

To adjust advanced programming:

1. Press Advanced.

- 2. On the next page:
 - a. Drag sliders left or right to adjust Master Dimmer, Strobe, Auto Speed, etc.

Master Dimmer 0	
Color 255,255,140,0	
Color Temperature 0	No Function 👻
Strobe 0	No Function
Auto Programs 0	No Function 👻
Auto Speed 0	

The available programming options will vary depending on the fixtures that are being programmed.

b. Select the Color box to open color options (see Static Color).

Color	
255,255,140,0	

c. Adjust the **Color Temp**, **Auto Programs**, and/or **Dimmer Mode** by selecting the arrow on the right to trigger the drop-down menu with preset options for each function.

Master Dimmer 0		
Color 255,255,140,0		
Color Temperature 0	No Function	
Strobe 0	No Function	
Auto Programs 0	No Function	
Auto Speed 0		
Dim Mode 0	Menu Setting	
	No Function	
	Auto Program 1	
	Auto Program 2	
	Auto Program 3	
	Auto Program 4	
	Sound Program	
	Cancel	

d. Select Add to Show to save the new settings.

PLAYBACK

The **PLAYBACK** section lists all of the programmed scenes. Users can apply the blackout function, adjust the master dimmer, play programmed scenes, adjust playback speed, sync to box, view/edit scenes by step, add scenes/steps, and delete shows.

Blackout

The Blackout function sets the master dimmer to 0. To enable/disable the Blackout function:

- 1. Tap **Blackout** to enable the blackout function.
- 2. Tap Blackout again to disable blackout function.

This function only takes effect after the current scene's step has completed playback.

Master Dimmer

The Master Dimmer function controls the minimum and maximum value that all shows can reach. To manually adjust the master dimmer:

1. Move the fader left or right to increase or decrease the value.

|--|--|

Playback Shows

The Playback function allows users to play saved or programmed shows. To use this function: 1. Select the desired show from the list.

2. Once selected, the show name will turn red. The fixture may take several seconds to begin playing the show.

			以 ^
Speed	0		
		00:00:24	

Playback Speed

The Playback Speed functions enable users to adjust speed in which the saved scenes or steps are played. To use these functions:

- 1. Select the arrow next to the show name to trigger the drop-down menu.
- 2. Drag the slider left or right to increase or decrease the show's playback speed.
- 3. Use the **BPM** (Beats Per Minute) box to manually adjust playback speed. Tap any part of the **Tap Sync** box, or select the dial to increase or decrease playback speed.

Certain effects (e.g., Pulse and Fade) will trigger the BPM function.

Sync to Box

Even though a scene/step has already been programmed, it may not immediately sync to the FlareCON Air 2. When this occurs, users can choose to sync to the FlareCON Air 2 manually.

To sync to box:

1. Locate and tap the sync icon.

2. The loading icon may appear.

3. Once the loading icon has disappeared, the new programming has been synced to box and the show is up to date.

A show should sync to the FlareCON Air 2 upon first playback.

View/ Edit Show

It is possible to edit various settings in the Edit Show page. Users can rename shows, adjust scene/step timing, customize shows, add more scenes and steps to a show, and delete steps.

Edit Show

To open the Edit Show page:

1. Select the view/edit icon next to the show name on the **Playback** page.

		Show 1	
		×	
		Blackout	
Master Dimmer	0		
	Show 1		\$~ C ~

2. The page will change to display the name of the show and a list of scenes and steps as well as the fixtures that have been saved for that show.

- 3. To adjust the Strobe, Speed, Fade time, or Hold Time on an effect, use the bar and faders to adjust the value from 0 to 255.
- 4. To adjust the color on an effect, select the color to open the **Edit Effect** box (see <u>Advanced</u> for further instruction on how to use the Color Preset, Color Palette, or Color Mixer in the **Edit Effect** box).

5. Select Save.

Sa	ave	

Wipe All Data

This option allows users to wipe all data, wipe all data except patched fixture, or to reset the Well Com Box.

- Wipe all Data wipes all data except the data in the WELL COM Box.
- Wipe All Except Patched Fixture wipes all data except the programming in the patched fixture and in the WELL COM box.
- **Reset Box** resets saved data that may have been stored in the WELL COM box even after users chose to wipe all data or to wipe all except patched fixture.

To enable any of the three options:

1. Press **Wipe** to trigger a pop up box.

2. Select Wipe all Data, Wipe All Except Patched Fixture, or Reset Box from the pop up box.

3. One of three pop-up boxes will appear. Select **Okay** to wipe/reset or **Cancel** to return to the **Settings** page.

	4 GHI	5 JKL	6 MNO	
	7 PQRS	8 TUV	9 wxyz	
	$\langle X \rangle$	0	Go	

3. Tap **<Go>** on the keypad. A notification saying the SSID and password have been reset will be displayed.

Although both the SSID and Password can be edited, it is not recommended to do so.
